

**proPERLA® Water Repellent** is a water based water repellent based on the latest nanotechnology, that can be used on all mineral surfaces on walls, roofs and paving slabs. proPERLA® is a special chemical composition that reacts with mineral groups and actively bond to mineral surfaces such as concrete and protect against rain, dirt, algae, pollution, oil and others.

#### **Recommended for:**

Mineral surfaces like concrete, clay, terracotta and slate etc.

Apply directly on surfaces less than one year old. Older surfaces must first be cleaned thoroughly with a pressure washer before treatment. Surfaces with strong discoloration, algae or moss growth (as well as heavily soiled surfaces) should be treated with proPERLA® CLEANER and finally rinsed with water before treatment.

#### **Preparation**

The surface needs to be dry, clean and free from contamination.

#### **Application**

Use low-pressure pump, sprayer, brush or roller. A minimum temperature of 5 °C is needed.

#### **Recommendation**

Always make a test coat to ensure the compatibility of product and surface.

#### **Coverage rate**

150-200 ml per m<sup>2</sup> depending on surface porosity

#### **Equipment care**

Cleaned up in water directly after use.

#### **Storage**

Store dry and frost-free. Keep out of reach of children.

#### **Shelf life**

24 months (in original sealed container).

#### **Packing sizes**

Can 25 litres.

#### **Colour**

Colourless when applied.

#### **Thinning**

Undiluted.

#### **Drying time**

Approx. 1 hour at 20° C and 60% RH.

#### **Properties and Advantages**

- Based on the latest technology.
- Scientifically engineered to protect mineral surfaces by active binding.
- Specifically designed for concrete, clay roof tiles, brick walls and mineral surfaces.
- Extremely water repellent and self-cleaning.
- Obstructs discoloration
- Minimizes salt efflorescence.
- Reduces growth of moss, algae and lichen.
