

This unique roof impregnation technology makes roof tiles self cleaning, extremely water repellent and allows the roof to breathe naturally.

RENOTEC®

Roof Coating

Roof Coating with excellent properties.

BEFORE

AFTER

Super hydrophobic

The excellent hydrophobic properties will make your roof dry and extremely resistant to biological hazards, mould, mildew, etc. Dry roof tiles will improve the thermal resistance, prevent frost damage and reduce the growth of microbial spores.

Self cleaning effect

Dirt particles are unable to obtain a hold on a roof coated with RENOTEC® and will simply flow off with rainfall. Your roof tiles will remain clean and attractive for many years.

The benefits of applying it

- ✓ It is based on a special organic 100% acrylic formula (free of APEO) and contains specially selected pigments.
- ✓ Dirt particles are unable to obtain a hold on a roof coated with RENOTEC® and will simply flow off with rainfall.
- ✓ Dry roof tiles will improve the thermal resistance, prevent frost damage and reduce the growth of microbial spores.
- ✓ It makes roof tiles self cleaning, extremely water repellent and allows the roof to breathe naturally.
- ✓ Treatments with RENOTEC® will extend the lifetime of roof tiles and minimize further surface erosion.
